MonitorAI Setup & User Guide

This manual provides step-by-step instructions to register a user account, download client files, run the telemetry agent on any laptop, and view real-time performance on the admin dashboard.

Step-by-Step Setup Instructions

• 1. Open the Website:
Visit the live dashboard URL: **https://mini-project-phi-green.vercel.app/**

• 2. Register a New Account:
Go to **https://mini-project-phi-green.vercel.app/auth/register** and create a new user account (e.g. Username: **Aishwarya** / Password: **Aishu@123**).

• 3. Download the Required Files:
After logging in, download the following three files from the dashboard header links:

- **1. Agent Script** (client_agent.py)
- **2. Requirements** (requirements.txt)
- **3. One-Click Launcher** (run_client.bat)

• 4. Create a Folder:
Create a new folder on your computer named **MonitorAI** and move all three downloaded files into this folder.

• 5. Run the Client Telemetry Agent:
Open the **MonitorAI** folder and double-click **run_client.bat**. When the Command Prompt window appears, enter the following details when prompted:

- **Server URL:** https://mini-project-phi-green.vercel.app
- **Username:** Aishwarya *(or your registered username)*
- **Password:** Aishu@123 *(or your registered password)*

• 6. Register a Test Account (Optional):
Open https://mini-project-phi-green.vercel.app/auth/register to register additional test user accounts.

• 7. View Connected Client Performance (Admin Dashboard):
Open your web browser and go to **https://mini-project-phi-green.vercel.app/**.
Log in using the administrator credentials:

- **Admin Username:** admin
- **Admin Password:** admin123

Select your connected laptop from the **Select Remote Machine** dropdown menu to monitor live CPU, Memory, Disk, and Network telemetry.
